The Dot.24 is a magnetic LED module that connects to the Magtrak profile to provide a superior appearance and easy installation. It produces a beautiful beam of light that can enhance any surface.

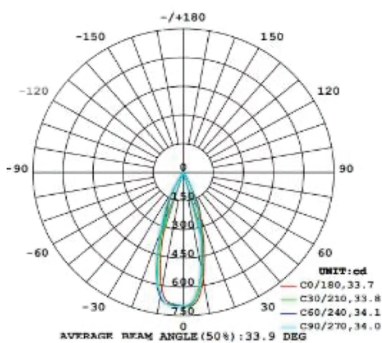

The Dot.24 is embedded within the Magtrak profile, making it appear as an invisible light source. It provides comfortable lighting with minimal glare by using twenty-four light beams, which are all enhanced by an antiglare cover.

The Dot.24 offers three beam angle options, 20°, 34°, or 48°, allowing you to create a focused or wider, softer ambience in a warm 2700k glow.
