The Fold.06 LED module boasts a magnetic connection to the Magtrak profile, resulting in a sleeker installation and appearance. It produces a beautiful beam of light that can improve the appearance of any surface it is projected onto.

The Fold.06 is a unique combination of spot lighting and wall washing. It has six lights and a 90° foldable angle, allowing for 180° directional focus with minimal glare.

The Fold.06 offers three beam angle options, 20°, 34°, or 48°, allowing you to create a focused or wider, softer ambience in a warm 2700k glow.
