The Magtrak system is a versatile, modern lighting solution that can elevate the look of any space with its clean lines and minimalistic appearance. Whether it's for luxury homes, high-end offices, or retail premises, the possibilities are endless.

With Magtrak, you can easily add different lighting points to light up your room both functionally and atmospherically. Track lighting systems are commonly used in large spaces with only one electrical connection, such as shops, theatres, and galleries.

The Magtrak system offers three mounting profiles: recessed, surface-mounted, and pendant track lighting. You can choose from various lighting modules like spotlights or linear lights to create different atmospheres within the same track lighting system.

Product Category: Track Lighting

Notes

- Surface profile is used for both pendant mounting & surface mounting.
- Magtrak can run upto 50m from a single power source.
- Due to it's seamless connection method, Magtrak cannot be "cut" or reduced in length from its standard 1m & 2m lengths.

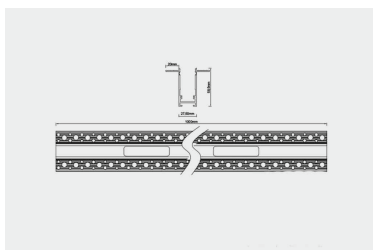

Mounting Profile Recessed / Surface (Suspended is a surface length with a pendant kit)

Length 1 metre length / 2 metre length
